FREE MEDICAL TREATMENT

Ministry type	Church
Area of impact	Physical
Country	Myanmar
Approx. date	November 28, 2010
Report source	Brother Vum (comment by Susie Steen)

On two to three different occasions, Robin and Susie taught wholistic ministry at BT Seminary in Yangon. Dr. Vum was the attending professor. Since that time the professor and his wife pioneered a church and a nursery school in a community not far from the seminary. This is an account written by Dr. Vum of what his church did a few days ago to minister to the community. (Susie Steen)

Concerning my small-extended ministry, we conducted a half-day of Free Medical Treatment last Sunday afternoon until the evening finishing at 8:00 PM at my church compound for my Nursery children including the parents, for Sunday School children and for our neighbor people who could not afford to go to a clinic.

This wholistic ministry was done with the help of one of our Burmese Christian Medical Teams. It was successfully done and the people's reaction was great and many of the patients were healed from their sickness and improved in their health.

For this small holistic work, we give our sincere thanks to God for allowing us to do this little part for God's mission although we spent some of our efforts. But we were satisfied that it was a time to invest our lives and things for the Lord's ministry. In fact, the Lord will do and provide the rest of other things/needs. And we eagerly pray for those people who were treated for changed lives and that they understand God's love for them.
