### Seed Project in Prison

In last visit, Lily Rana and Puspa Gurung, Tansen Church came to know that Danny has some problem with his hands. He has been imprisoned in Tansen jail for last few years for murdering case. Danny heard the gospel several years ago but not believed in Christ.

While Lily and Puspa were there visiting prisoners, Danny shared them about his problem with his hands. As they prayed for him, the Lord inspired them to do something for him. They talked with the mission hospital in Tansen and authorities in the prison about Danny's problem. Praise the Lord for the providence for his surgery by the mission hospital and couple of local people in Tansen Church. Some of costs for his surgery were covered by some believers and rest was provided by the charity in the hospital. Finally he got the surgery and now there is no more pain with his hands. He is very happy and grateful to the Lord for the treatment. He received Christ and baptized with other eight prisoners few months back. Now there are more prisoners who have been very open to the gospel because of the love that was demonstrated by Christian. There is an ongoing Christian fellowship in the prison every week. People from the church along with Lily and Puspa go visit them time to time. Lily and Puspa are praying for a color TV set to be provided to prisoners as the next seed project.
