My wife and I went to Romblon Island to talk on love and promote the Vision Conference. More 200 people came to hear the love of God or "Real Love waits" in particular. It was a blessed experience. We were invited as part of the government's program (Department of Health) for the teen and youth program. They recognize that the church has a role in transformation.

It is for the youth to have a perspective that the greatest love story they can ever experience will only happen with God as the director. And if they can wait for love, then less teen pregnancies, STDs etc.

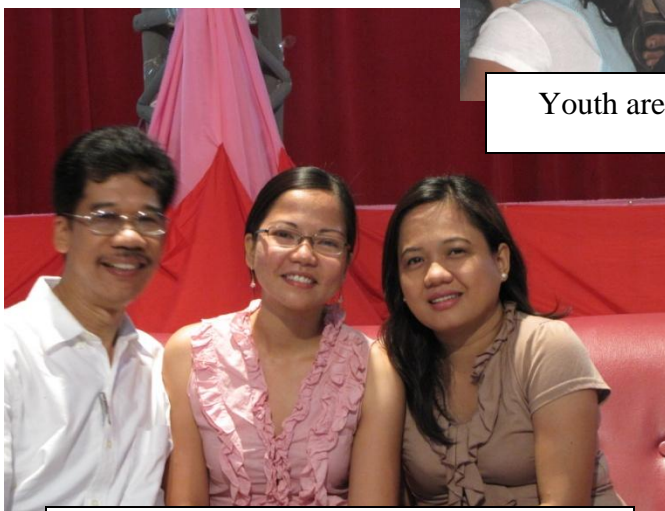

It was a simple address to the youth to explain that love can really wait, that they just enjoy their singlehood, discovering and developing themselves in to better, more responsible individuals, and hopefully at the end of it, they feel the desire that "Lord, I want to know you more".
