Area of impact	Physical and social
Country	Togo (Nyamesiva)
Approx. date	7 th September 2009
Report source	E. Happy Aziadekey happyenyo@yahoo.fr

Friday 6th September 2009, The Choral of our church and me went to Nyamesiva, a village sited at 69 km from Lome for a seed project. The following day, in the morning, we worked together with the village to clean the circumference of public toilet of the village, and repair to road which lead to the village (about 1, 5 Km).

At the afternoon, we played soccer with the youth of the village. We won them (1/0). At the end of the match; we gave them the ball we played and shared with them some biscuits and minerals; and told them that we love them and the way to express this love is what we had done. All the village and youth were amazed by what they had seen. That very night an old man came to us and said: I want to give my life to Jesus-Christ.

In this village, we started a church which is persecuted by villagers. But after the seed project, the church has a good reputation. Many youth came to us and asked us to pray for them, so that they can be like us. The church is growing up and has attended two others nearer villages.
