There was rubbish beside our cell group house in Lome, capital of Togo. People even urinate there. We can't appreciate the fact that dirt be beside where we adore our Lord every Wednesday evening; so we plan to clean it. Thus, 23th January 2010, in the morning all members of our cell group came together with tools to work. After prayer, we made a hole and started to bury the dirt. After three to four hours, we finish the task by making the place very beautiful. All those who were passing by and saw us working hard and singing with joy were amazed. They couldn't believe that we were doing such a job voluntarily.

Knowing that we are Christians, many asked about the church we belong to. Some said that if that is the church, then it is good.

After that seed project, people of the community started to give more respect to us. They used to say: "Your church is different from others"
