October 6, 2009

Please keep praying for a serious problem in our country, lack of electricity

40 % of the electricity generated in the Dominican Republic is lost. This represents a lot of money, thousands of dollars per year, data presented in a conference held in Santo Domingo.

Please pray for the harvesting of rice, our main cereal in the country

A number of rice harvesters from Maria Trinidad Sanchez denounced that the lack of water and high cost of living threatens the production of rice in the zone, reason by which they are asking the authorities to help them. They are about to lose their production if the government does not come to help.

Please pray for our visa process to go to the Vision Conference in Peru.

Please pray for this Vision Conference, that the Lord will prepare the hearts of the people to be involved in that conference.

Please pray for our training program and for those collaborators who will be teaching in the training centers during our absence.

Your brother,

Ricci Paulino
