

Emmanuel united church has been working towards community transformation through envisioning and equipping local churches for holistic ministry. Towards fulfilling this dream, we have been able to train and mentor first generation pastors .We have also seen local churches intentionally demonstrating God's love through acts of mercy. Even, the local government has acknowledged it through giving certificate of appreciation to our local churches. God has abundantly blessed us through this ministry of love. This reminds me of Bob's teaching of Kingdom Math. He has taught us how God blesses sacrificial services of his people.

Currently, the church has grown to have over 140 churches and several new pastors are emerging. They have not been properly given training on holistic ministry. On the other hand, we are committed to make holistic thinking and ministry the DNA of our church. Therefore, the need for training these emerging leaders was very evident.

The training was conducted for the second generation of leaders from all around the country for 3 days. They were 21. These leaders have assumed pastoral ministry in the past 3 years. They were enthusiastic and encouraged. They have set to train respective members on holistic ministry. They also set a goal to do seed project with the elders of their church so as to exemplify holistic ministry for the saints. We will also set time to meet for follow up conference.
