**The participants**

### **A testimony according to this training**

**As testimony: these participants give much participation in this training. By asking questions on things that they don't understand.**

**In this training too we found two participants stand and say the ten (10) characteristics and the twee objectives of the "Seed Project". So that is not a thing that we find very often.**

**Report presentation**

**People in training**

**She is one of the two participants who say the ten characteristics and the twee objectives of the "Seed Project".**
